RACER INU GAME MODE

F2P

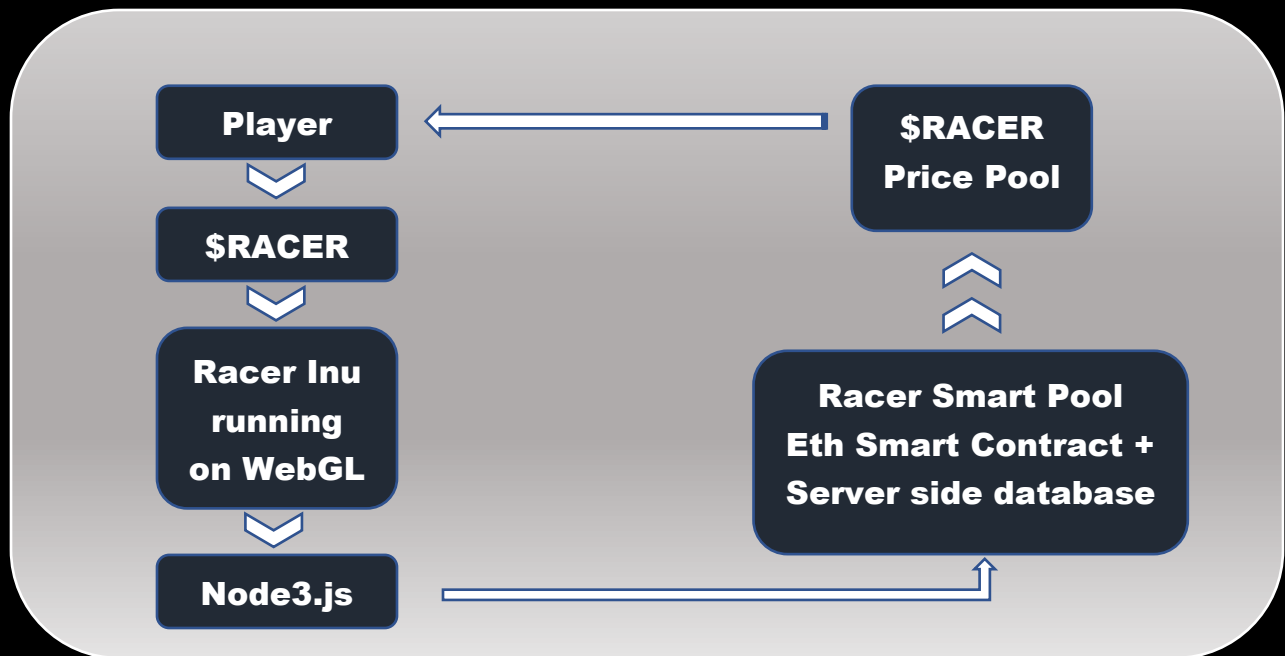

User can participate in singleplayer mode by driving the Racer inu car. When you play F2P mode, you will be able to participate in best time tournaments. The top scores on the leaderboard will split the prize pool grant.

P2E

There are two game modes in P2E mode. 1vs1 and 10players battles will compete for the money that they have allocated to the prize pool. To participate in PVP mode, players must first mint a custom \$Racer Inu NFT car. Cars will differ in appearance and style, to improved their skills and gear on the game mode. All competitors will have a chance of winning the race.

RACER INU SMART CONTRACT

Racer Inu is developed using WebGL. Players will have multiple options to play the game, single- and multiplayer. Multiplayer game includes different racing options. 1vs1 and 10 players game mode. Players are contributing a certain amount of tokens to the prize pool before the race and the prize pool is split by Racer Smart Pool between the winners of the race. Racer Inu has a crypto integrated backend that runs on Ethereum Smart Chain. Smart contracts are responsible for prize pool redistribution and web3.js takes care of the wallet connection.
